

An Overview

Presentation to the Suncoast League of Municipalities

SCS was formed in 1970 in Southern California by Bob Stearns (C), Tom Conrad (L), and Curt Schmidt (R), three civil engineers with broad backgrounds in the then-new field of environmental engineering.

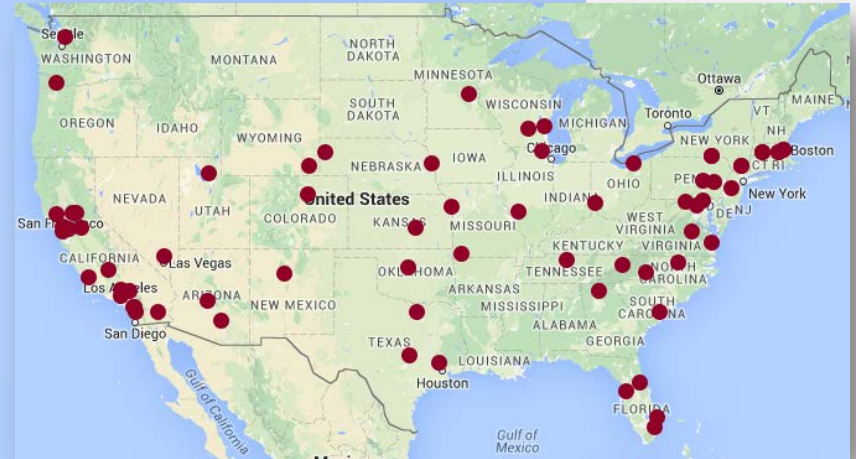

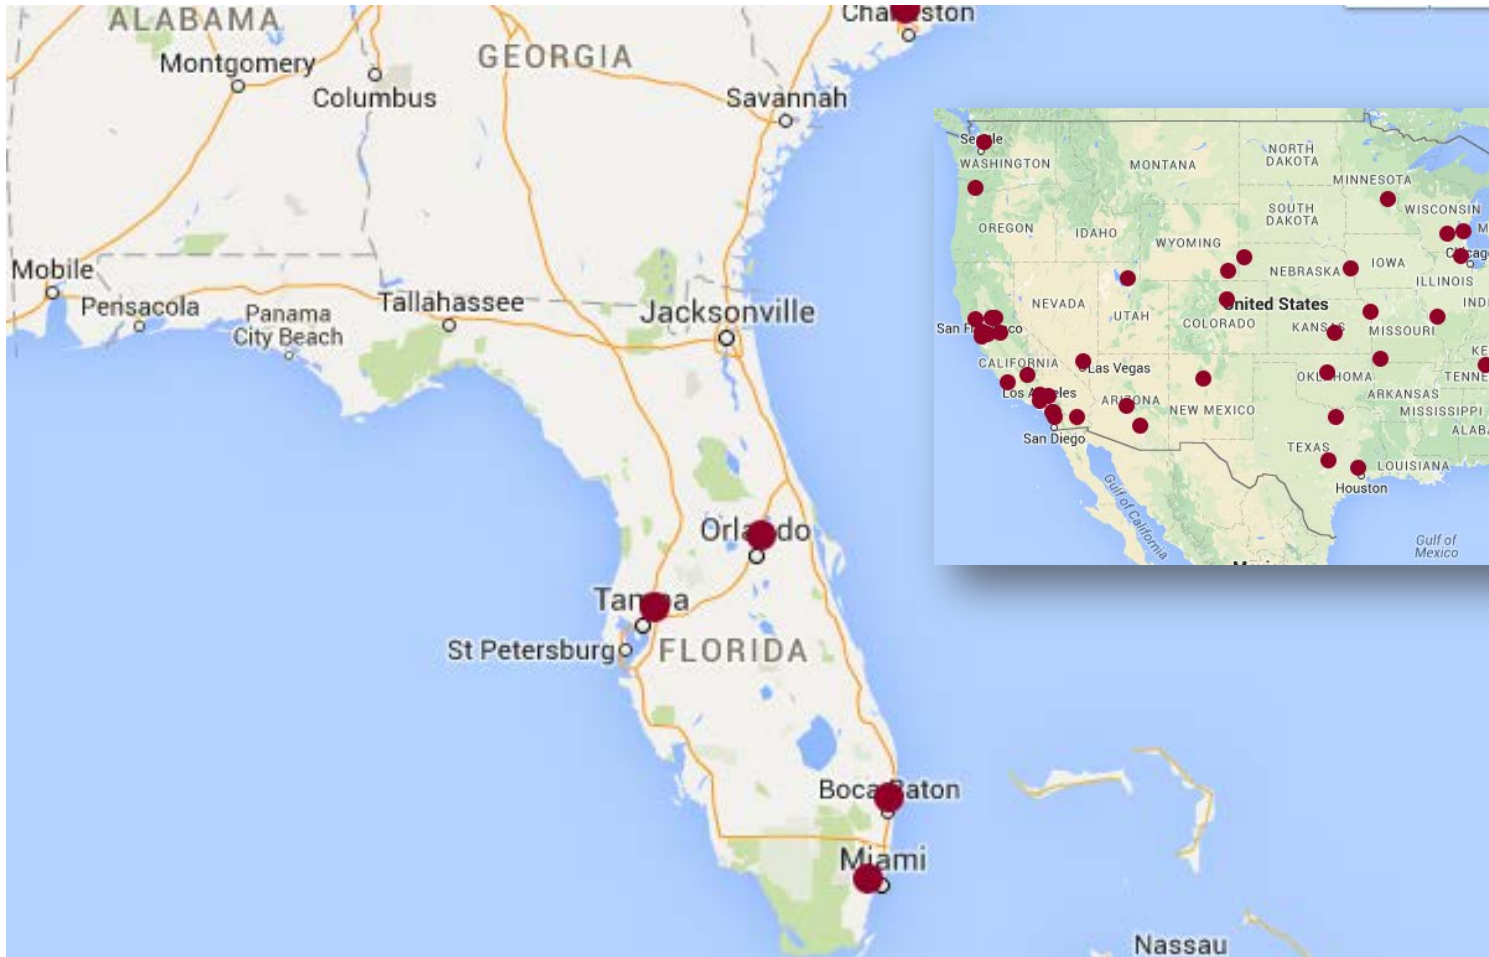

December 18, 2015

Key Facts About SCS

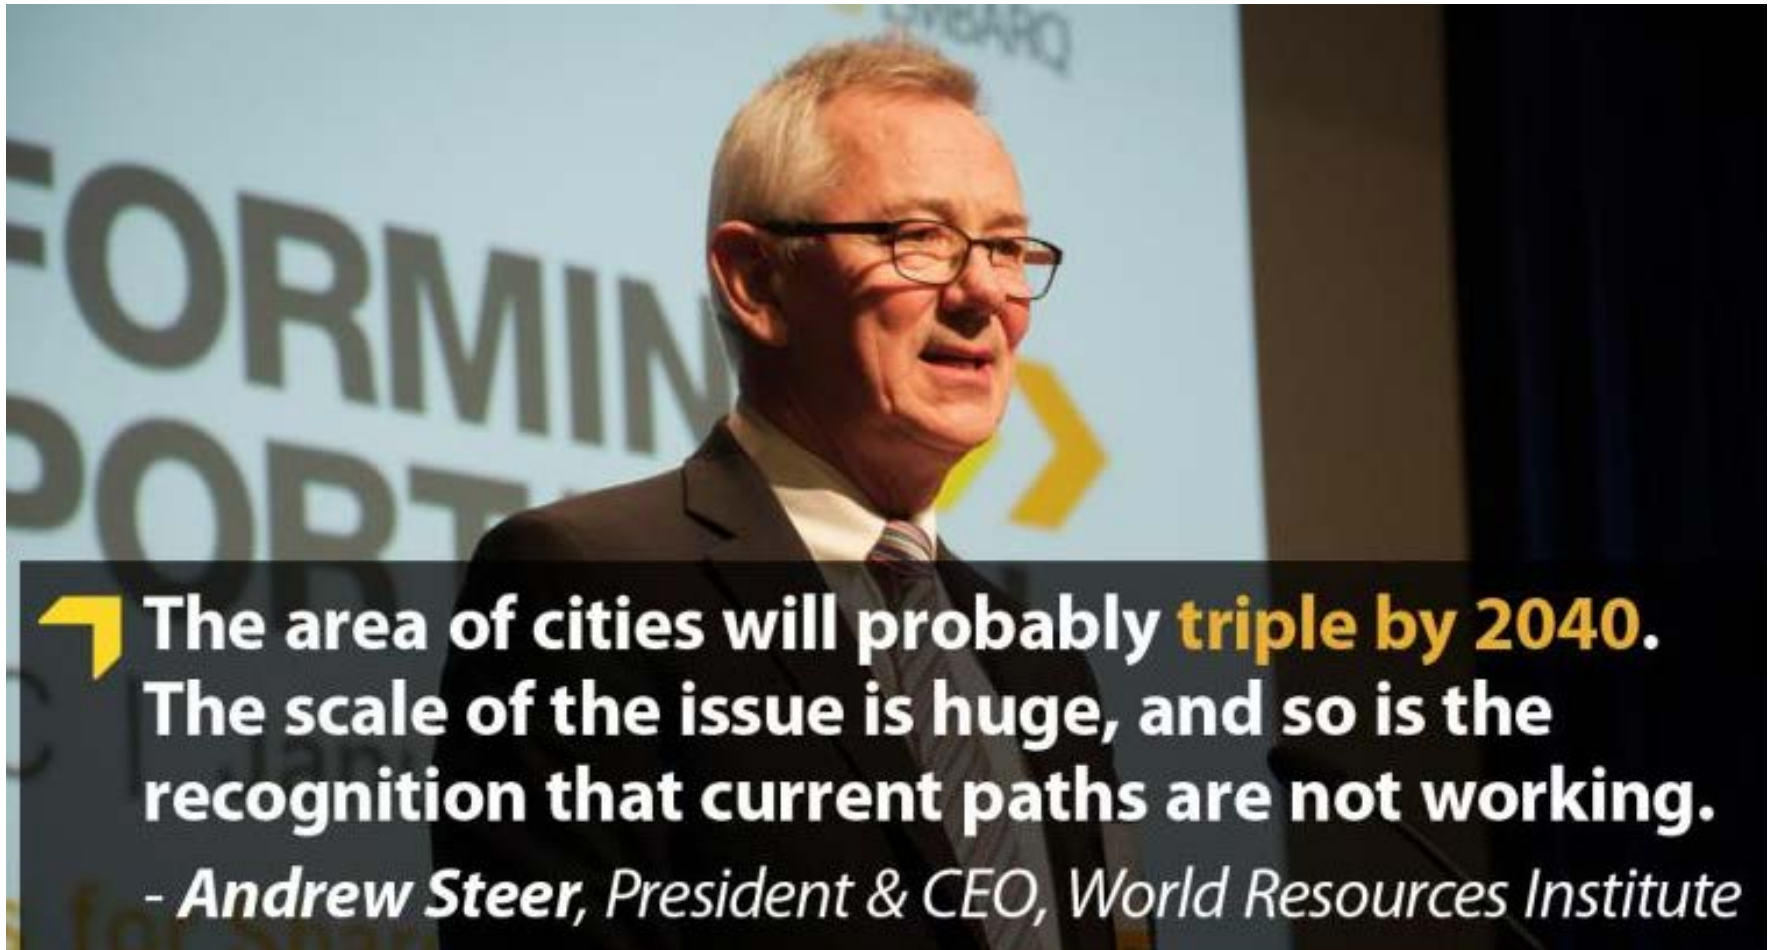

- Founded in 1970
- \$160 Million in Revenues
- 750+ Employee Owners
- 70 Offices Nationwide
- Adopt our clients' environmental challenges as our own

Florida Offices

Improve the Livability of Cities

Solid Waste Collection

With the transition to automated collection and single stream recycling, ratepayers will save **\$64.6 million** dollars over term of contract

Facility Design

Increased levels of service as well as enhancing opportunities for waste diversion and recycling

Business Planning

Worked with municipal agencies to optimize operations and reduce customer costs

Rate and Financial Analysis

Completed more than 50 rate, cost of service studies, and financial plans

Parks Remediation

The Miami Parks Cleanup Program was developed to provide an environmental solution that eliminates the need for offsite disposal of the affected soils, thereby reducing an estimated 670 metric tons of carbon dioxide from being released into the atmosphere

Zero Waste Programs

The management of organic wastes is increasingly at the forefront of community recycling initiatives
